Digital Asset Management Working Group

Tue, 07/22/2014 - 2:46pm — [tvalentine](#) ^[1]

Digital asset management (DAM) for LTER sites includes the management of photographs, historical documents, web camera images, videos, maps, aerial photography, audio recordings, and photo points. These data/assets are not documented within the EML and database framework of LTER, and many sites are trying to find a system to document, catalog, archive, and provide a searchable interface on the web.

The focus of the group is to research options for DAM software, make a recommendation to LTER sites for implementation, and help with standardized metadata and cross-site searching capability.
